cultural philosopher and acclaimed physicist

the new universe and the human future:  
understanding our place in the big picture

modern science has afforded us an unprecedented understanding of our universe and origin story. with an increasing realization that our current lifestyle is unsustainable, might a common understanding of our scientific story free us to think more expansively about our politics, economy and identity?

wednesday, november 16, 6:30pm

limited seating, rsvp required by mon 11/14

rsvp: [deepakhomebase.com/events](http://deepakhomebase.com/events)

at abc home on the mezz 888 broadway at e 19 st [deepakhomebase.com](http://deepakhomebase.com)
